Digital transformation tool.

The fast-growing digital landscape is forcing enterprises to move on to new business strategies that use new ways to provide IT services, rapid access to IT resources and new opportunities for developers.

The cloud platform based on open source solutions developer Tionix Holding offers corporate customers a completely new scalable and flexible IaaS cloud platform named **AccentOS** and based on OpenStack Train.

AccentOS offers corporate customers a powerful tool for digital transformation and instant implantation of a hybrid cloud at the expense of modularity, simplicity, unification and scalability, ensuring the full integration of all elements of the IT infrastructure in the cloud and the rapid migration of software platforms and information systems of client.

	Solutions	Service
IT infrastructure	Corporate cloud	IaaS and Core Cloud Management Services
IT Infrastructure Applications	AD, TRS, Backup system, VPN, Mail monitoring, information security	PaaS, DBaaS, BaaS, VPNaaS, information security
PC and application, access	Office users PC, thin clients, CAD/CAM, applications MS Office and OpenSource	DaaS/DaaS, office applications as a service, SaaS

Cloud platform AccentOS.

Cloud platform AccentOS designed in accordance with the **principles of building corporate systems** (open standards and technologies, unification, compatibility, scalability, integration, reliability, simplicity) develops **software components of OpenStack** (virtualization, security, management) and other companies to provide platform functionality and create their **own software modules** (IT infrastructure virtualization, desktop virtualization, virtualization of finished platforms and applications).

AccentOS provides Clients:

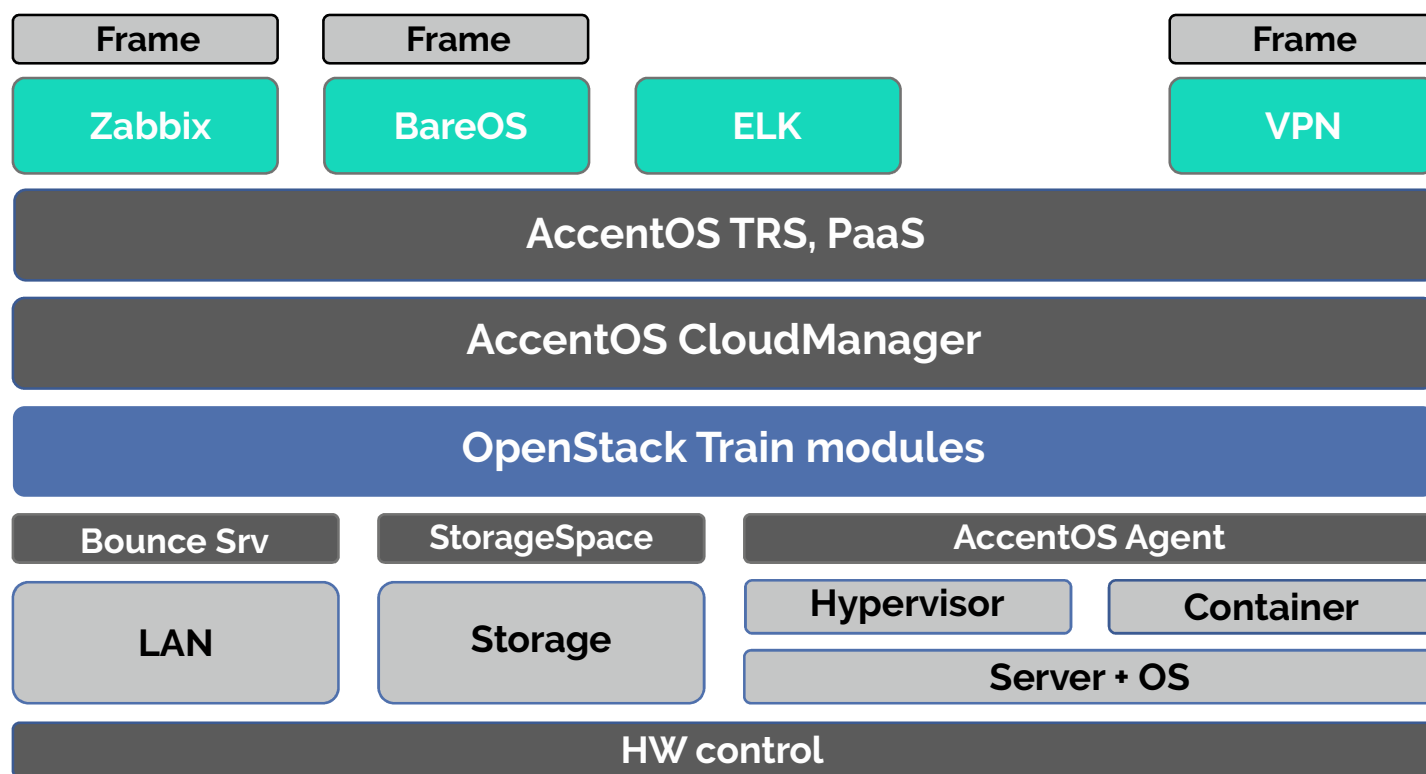

- ◆ IaaS services for private and hybrid cloud;
- ◆ Virtualization services workstations TRS (RSServer);
- ◆ High speed data storage services;
- ◆ Monitoring, access, backup services.

ACCENTOS!

CLOUD PLATFORM

AccentOS provides administrators of the Client:

- ◆ **management tools** (deployment, automation of functions, order self-service, monitoring, backup, access);
- ◆ **high availability** (self-healing during an accident, restoration of the control system, migration of VMs and data);
- ◆ **resource optimization** (computing resources, load balancing, software product licenses);
- ◆ **effective exploitation tools** (self-diagnosis, detailed logging, quality documentation, multilingual interface);
- ◆ **development and technical support of products** (compliance with the requirements for industrial development and software support, operability and integration with other products and operating systems).

AccentOS provides the customer free choice:

- ◆ architecture (distribution, availability, performance, security);
- ◆ virtualization technologies (KVM, XEN, Hyper-V, Docker, LXC ...);
- ◆ hardware (network, storage, server platform, CPU x86, ARM, Elbrus, Power);
- ◆ operating systems (CentOS 8, Debian 10, Astra Linux, Basalt, guest Windows OS).

AccentOS included in the registry of Russian software and provides protection for the private cloud in accordance with the requirements of Russian Federation law:
